Se's "like" its inside one that is within a larger  
room - enclosure that is brightly lit w/ cool flat light  
& is present unoccupied.

Adh - Impression that document is missing + person who owns it  
has asked us to find it.

Sel's like in a flower in a Wohnzimmer - H/L's impression of  
an unmade bed / bystand / etc. Small, slightly claustrophobic - reminds me  
of the sort of bedroom one finds in a older trailer home - small  
windows or none at all. Unadorned lighting with weak bulbs.

AL BK  
few of  
depression

Sel's one door wide inside room are dark, wood grain-like, add a  
claustrophobic impression. Mirror. Rest of Wohnung similar  
disheveled. Impression of "living unit" - not individual home,  
but one unit of collective living arrangement "like"  
apartment bldg, trailer court & similar. Seem uniform  
structure rectangular. level. Open similar nearly

"like" apartment complex minimal yard/cour.  
masonry at least 7 stories tall. window. Dreamy  
setting

54 1/2 apartment perceived may not be document location, but have something to do with someone who had something to do with document.

location  
reminds me  
of Anacostia

54 1/2 person to whom place belongs spends long periods during day away from it. It's not exactly a "place of refuge," but rather a place person has to go to but doesn't think much about as a place to be in of itself. Person is male fairly solid. medium height. Not the best taste in dress. Expediency rules over fashion. The sort of person who might be inclined to wear checks with stripes. Not young anymore but not especially old - i.e. late 30's to late 40's. Dark hair. Brown is a color associated with this guy - like he likes brown, or everything he has is brown.

Does some distant circuitous route to where he occupies himself during the day. Office environment. Anyway, further sort of a place. One can be lost in the "establishment" and go on for years doing job without attracting attention. Processing. Clearly none. "Like" sort of centralized dispatching network a transfer point where things come in are shifted around & go out again to get list of distribution "routes" or destinations or whatever.

like  
office

person

Se's not laborer - is more white-collar sort, though  
is still "cog in the machine" - not really management,  
though has some related responsibilities.
